DETAILED ACTION

Drawings

Figure 17 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Page 47, line 15, it is not clear which "it is" is intended.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Onoda (6,038,432).

Regarding claim 1, Onoda (Figs. 3-7) discloses auto power control circuit comprising: a variable gain amplifier (1) can be read as a variable gain amplifier circuit having gain controlled by a gain control signal via D/A converter (8); a diode (4) can be read as a rectification circuit that rectifies an output signal via coupler (3); a comparator (5) that compares a rectified signal with a reference voltage which can be read as an arbitrarily preset voltage; an up/down converter ((7) can be read as a first up/down converter circuit having the function thereof; and a first D/A converter (8).

Regarding claim 2, wherein clock signal input to up/down counter from pulse generating circuit (19).

Regarding claim 6, wherein the up/down counter of Onoda is capable of exhibiting the claimed subject matters (see col. 7, lines 11-20).

Allowable Subject Matter

Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-13 are allowed.

Claim 3 calls for, among others, a first register (11).

Claim 4, 5, call for, among others, a first count operation control circuit (13).

Claims 7-13 call for, among others, a second D/A converter and a changeover circuit (20).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references (Akiya (5,752,171); Senda (5,566,363); Morishita (6,057,732)) disclose amplifier having control voltage.
